Which streaming services are involved

netflix

Hulu

hbo max

ect...

Problems we may have

How would we stay up to date with shows? Gather data?

Getting rights to shows

may be too cluttered and have too much data

How would we advertise to user's?

Will streaming services let us scrap their data?

Misc.

No business needed but could be monetized

Subscription based model for more features?

Features

For moblie, laptop/ computer, or TV use?

random show/movie button?

Account Sharing

customization? kids account/ personal account/ family account/ ect

Customization

screenshare/ co-op mode

Personal library that you can keep up with shows you have watched.

Add friends see what others are watching/ social feed

Sharing shows to social media (facebook, twitter, insta)

Design

Interactive (think roku screensaver?)

Dark mode

color scheme?

App/Website

No service like it but apple tv has a feature very close?
